★**Proceedings of the 51st Symposium on Ring Theory and Representation Theory.**

Held at Okayama University of Science, Okayama, September 19–22, 2018.

Edited by Izuru Mori.

*Symposium on Ring Theory and Representation Theory Organizing Committee,*  
*Shizuoka*, 2019. *xi*+161 pp.

{For the 50th Symposium see [MR3791808].}

**Papers in this collection include the following:**

Takahide Adachi and Aaron Chan, “A geometric model of Brauer graph algebras”, 1–5.  
MR3930668

Toshitaka Aoki, “Torsion classes for algebras with radical square zero”, 6–9. MR3930669

Tokuji Araya, Kei-ichiro Iima, Maiko Ono and Ryo Takahashi, “Dimensions of singularity categories of hypersurface of countable representation type”, 10–15. MR3930670

Sota Asai, “The chamber structures of the Grothendieck groups coming from bricks”, 16–22. MR3930671

Haruhisa Enomoto, “Relations for Grothendieck groups and representation-finiteness” (Japanese), 23–29. MR3930672

Norihiro Hanihara, “Auslander correspondence for triangulated categories”, 30–34. MR3930673

Mitsuo Hoshino, Noritsugu Kameyama and Hirotaka Koga, “Frobenius ring homomorphisms”, 35–44. MR3930674

Ayako Itaba and Masaki Matsuno, “The defining relations of geometric algebras of type EC”, 45–51. MR3930675

Tomohiro Itagaki, “Batalin-Vilkovisky algebra structures on the Hochschild cohomology of self-injective Nakayama algebras”, 52–56. MR3930676

Shigeo Koshitani and Taro Sakurai, “On certain Morita invariants involving commutator subspace and radical powers”, 57–61. MR3930677

Akira Masuoka, “Quotients  $G/H$  in super-symmetry”, 62–67. MR3930678

Hiroki Matsui, “Connectedness of the Balmer spectrum of the right bounded derived category of a commutative Noetherian ring”, 68–75. MR3930679

Hiroyuki Minamoto, “Resolution of DG-modules”, 76–81. MR3930680

Kengo Miyamoto, “Components of the stable Auslander-Reiten quiver for a symmetric order over a complete discrete valuation ring” (Japanese), 82–91. MR3930681

Yuya Mizuno, “Sortable elements and torsion pairs for quivers”, 92–99. MR3930682

Kaoru Motose, “Cyclotomic polynomials”, 100–103. MR3930683

Yusuke Nakajima, “Finite dimensional algebras arising from dimer models and their derived equivalences”, 104–109. MR3930684

Kazunori Nakamoto and Takeshi Torii, “An application of Hochschild cohomology to the moduli of subalgebras of the full matrix ring”, 110–118. MR3930685

Hiroyuki Nakaoka, “Some remarks on Avella-Alaminos-Geiss invariants of gentle algebras” (Japanese), 119–124. MR3930686
